ADVERTISEMENT
Don't blame your age for poor hearing

Chicago, Ill.—A free offer of special interest to those who hear but do not understand words has been announced by Beltone. A non-operating model of the smallest Beltone aid of its kind will be given absolutely free to anyone answering this advertisement.

True, all hearing problems are not alike . . . and some cannot be helped by a hearing aid. But audiologists report that *many can*. So, send for this non-operating model now. Wear it in the privacy of your own home to see how tiny hearing help can be. It's yours to keep, free. The actual aid weighs less than a third of an ounce, and it's all at ear level, in one unit.

These models are free, so we suggest you write for yours now. Again, we repeat, there is no cost, and certainly no obligation. Thousands have already been mailed, so write today to Dept. 9922, Beltone Electronics, 4201 W. Victoria St., Chicago, Ill. 60646.

Strawberries are one of the few crops that have not been successfully harvested with mechanized equipment. There is some talk that there may come a time when strawberries will not be offered in the supermarket because of the high cost of harvesting.
A small planting of 75 to 100 plants will provide the necessary fresh fruit as well as fruit for preserving and freezing for the average family.
Weeds are the biggest problem and they can be controlled with a little extra effort.
In this area March is the ideal time for transplanting strawberries. If you want to be assurred of plants and especially plants of a particular variety, they should be ordered now for March delivery.

Fire cured tobacco growers are elated over prices during the first week of sales. This should encourage production next year. If you haven't pulled your soil samples why not do it now. Don't wait until everyone starts doing it next spring.

* * *

Home lawns need a shot of nitrogen now. If you are using ammonium nitrate, apply at the rate of four pounds per 1000 square feet.

* * *

Pick a day when the temperature is 60 degrees or higher and spray lawns with Silvex plus 2, 4-D. This will remove most of the trouble some weeds.

It's cold enough to kill hogs and this suggests curing hams and bacon. Publication 224 outlines how to get the job done-ask for a copy from our office.
A mixture of 8 Pounds of salt, 3 pounds of sugar and 3 ounces of saltpeter makes an excellent curing compound. Allow 7 to 10 days of curing time per inch of thickness. Re-rub the meat every two to three days.

Sweet potatoes contain about 5 to 6% protein (dry weight basis) and are an excellant source of lysine, isoleucine and valine - three essential ammino acids.
Sweet potatoes are also an excellant sorce of carotene, from which our bodies make Vitamin A.
If, as some experts of the world food situation predict, we may find in the not to distant future that we must consume less meat, fish, eggs and dairy products, sweet potatoes could become an even mere important food crop.

Vegetable seed like many things are rapidly increasing in price. Often times you can save seed left over to use the following year if they are carefully stored. Or you might cut cost by saving non-hybrid seed from the garden to plant the following year.
Two important factors that reduce seed life are high seed moisture and high temperature Here are some rules-of-thumb:
(1) For each 1% decrease in seed moisture the life of the seed is doubled.
(2) For each 10 degree drop in storage temperature the life of the seed is doubled.
For example-onion seed, a notoriously short lived seed, stored at 14% moisture at 90 degrees F. were all dead in one week. The same seed dried to 6% moisture and stored in a sealed container were viable after 20 years.
So-dry them well-seal in a tight container and store at low temperatures to insure quality seed.
